

# Manual Drum Mounted Rotary AdBlue™ Pump

---

300ml Per Rev (approx.)

## About the product

The Manual Rotary AdBlue™ Pump is designed for the transfer of AdBlue™, also known as DEF, from a drum. They are a popular solution when mains power is not accessible, or when the costs associated with a more sophisticated [AdBlue pump](#) cannot be justified, perhaps due to the low quantities being dispensed. This [Piusi](#) AdBlue™ drum pump can also be supplied with a hose and spout should the user require it.

## Features of the Rotary AdBlue™ Hand Pump:

- AdBlue™ Hand Pump
- Polypropylene body
- Rotary mechanism
- Max flow rate: 300ml per rev
- 2" BSP drum adaptor
- Suction down tube for drum
- Option with delivery hose & spout
