

Piusi K24 AdBlue™ Flow Meter

Digital (6-100ltr Per Min)

About the product

The [Piusi K24 AdBlue™ Flow Meter](#) is a reliable and accurate turbine digital flow meter designed to measure the quantity of AdBlue™, water, windscreen fluid or cattle milk (not for human consumption). This AdBlue™ meter is a lightweight, compact solution that can be fitted inline or at the end of the delivery nozzle for the easiest possible reading, and benefits from a rotatable face for flexible installation.

This is the flow meter used within all metered Piusi Suzzara Blue AdBlue™ pump kits, and is also available incorporated into an [AdBlue™ nozzle](#).

Features of the K24 AdBlue™ Meter:

- Digital turbine AdBlue™ flow meter
- Flow rate: 6-100ltrs Per Min
- Face can be rotated 4 ways for easy reading
- Flow rate indication
- 1" M BSP Inlet/Outlet c/w socket
- LCD electronic display (2 x AAA batteries)
- Accuracy +/-1% after calibration
- Working temperature -10°C/+50°C
- 5 digit partial and 6 digit totaliser
- Suitable for AdBlue™, water & windscreen
